

Class news for Term 4 from P2MB and P2JM

This term our context for learning will be **My Body**. We will be finding out about the different body organs and how they work and we will participate in some experiments using our senses. We will also learn about how we can look after ourselves and keep healthy. We will keep you posted about our activities on Class Dojo.

Maths – This term we will be focusing on measurement and position and movement. We will be using non-standard units to estimate and measure length, height, weight and volume.

Please continue to practise the ‘Learn Its’ at home. Friday’s ‘Beat That’s’ will focus on both addition and subtraction.

Literacy – Spelling homework now includes some sentence writing. In class we will continue to use these words in everyday activities to reinforce the correct spelling. We will work on consolidating use of simple punctuation in our writing. Also we will try to make our story writing more interesting by writing a beginning, a middle and an end.

As the weather gets warmer we will be outdoors more. Please remember to apply suncream before school and bring a sun hat and/or sunglasses. Please remember to name any new clothing. Thank you.
